

## ABOUT WORKSHOP

Thinking outside the box (sometimes erroneously called "thinking out of the box" or "thinking outside the square") is to think differently, unconventionally or from a new perspective. This phrase often refers to novel, creative and smart thinking.

This is sometimes called a process of lateral thought. The catchphrase, or cliché, has become widely used in business environments, especially by management consultants and executive coaches, and has spawned a number of advertising slogans. To think outside the box is to look further and try not to think of the obvious things, but try and think beyond that.

### Who should attend this workshop

All Students who have innovative ideas that have a possibility of commercialization.  
Maximum participation: 100 students
