## **About the Lecture**

Becoming Software Professional is the most common path taken as a start of the career after MCA. It is in demand and very good profession for the computer science graduates. However, rather than just following the trend, can we do a brainstorming on the future career? There is various natures of jobs available after MCA. Becoming Entrepreneur is another dimension which must be explored to check whether it matches our interest. This lecture will give you insights of what MCA is all about, and what kind of career opportunities is available for MCA degree holders. If you have inclination for startup and innovation, this session will give you the direction on how to take the first step.

## **Student Startup and Innovation Policy (SSIP)**

Government of India has declared 2010-20 as the decade of innovation to unleash the creative potential of every Indian. The youth of the country and the university system play a crucial role at every step to shape the innovation ecosystem. To build startup and innovation culture across universities is the key goal of Startup India action plan. The Student Startup & Innovation Policy of Government of Gujarat aims to create an integrated, statewide, university-based innovation ecosystem to support innovations and ideas of young students and provide a conducive environment for optimum harnessing of their creative pursuit.
