

One Day Seminar on

UNCOVERING ASPECTS OF PRIOR ART SEARCH FOR INNOVATION

09/08/2019

Organized By

Faculty of Pharmacy, Dharmsinh Desai University, Nadiad

Supported By

DDU Innovation Council

SSIP CELL

Nodal Institute for Startups and Innovation

Seminar Outline

Innovations can be patented provided they are new and non-obvious. The prior art refers to the body of knowledge that already exists on a subject. The prior art is required for the purpose of assessing novelty and patentability of the innovation. Hence, it is important to know and understand prior art to make distinction between what is already known and the invention. Inventors perform the basic prior art search to see what knowledge already exist prior to date of invention in various form such as patent, scientific literature, publications (such as journal articles, proceedings of conferences and display information from technical exhibitions). The current seminar is aimed to highlight essential aspects of prior art search like importance, objective, types, prerequisites and resources for establishment of patentability of the invention.
