

Construction of Skyscrapers

Objective: To make participants aware about modern high rise building construction and difficulties involved in constructing them.

Description: There were two participants in a team. There were also participants who had solo entry. The workshop fee was Rs. 60/Team. We expected a total of 60 entries.

Round 1: Workshop was conducted by Er. Paresh Patel. He had over 25+ years of experience in the field of Construction Management and had constructed many high rise buildings i.e. Skyscrapers. In the workshop, He shared his knowledge and experience with the participants informing them about the various aspects, importance, difficulties, step-wise process of constructing skyscrapers. Total of 32 teams (45 participants) attended the workshop and had a great learning experience. After attending this workshop, participants proceeded towards the Auditorium for participating in Central level workshop.
