

GOVERNMENT ENGINEERING COLLEGE, MODASA

CIVIL ENGINEERING DEPARTMENT

A report on expert lecture

Sub:- Industry startup and Innovation

Date:- 02-08-2018

Venue:- M. Visvesvaraya Hall (Room No. 1227)

Gujarat Government has launched Student Startup and Innovation Policy (SSIP) to encourage the students from the state to undertake innovative projects related to society, industries, and community for better solution of engineering problems and also to support student-led startups and innovations as well as create an Innovation and Pre-incubation Ecosystem Support (IPIES) across all universities of the state. Under the program It was aimed to promote innovation and pre-incubation awareness amongst students of higher and technical education and to facilitate guidance, evaluate projects and provide platform for commercialization of such projects.

The civil engineering department had arranged one seminar to motivate students of civil engineering branch to achieve the above objectives of the SSIP policy. The department invited the industrial expert Mr. Apurva Sheth to deliver an expert lecture on 'Awareness on Industry startup and innovations' for the students of Civil Engineering Department. The program was held at Civil Engineering Department of Government Engineering College, Modasa on 02-08-2018 (Thursday) from 12-00 PM onwards.

Expert gave his precious speech covering the points like start-up of industry, challenges, various managerial parts of industry, choices of engineering courses with additional law and management courses in combination etc. The students were very much excited to listen and also with interactive session, they had cleared their doubts by asking the questions based on the subject.
