SUMMARY

A webinar was organized by Entrepreneurship Development cell on 16th April 2020 on the topic The journey of a social entrepreneur which was conducted by Mr. Deepak Gadhia. The session started with the brief Introduction of the Speaker to the Audience by Jay Sudhani Sir. In this session Mr. Deepak Gadhia Talked about his journey of being a social Entrepreneur. He addressed the audience regarding his activity in the renewable energy field from the last 3 decades and about the successful commercialization of the renewable energy based projects. Due to his this Achievement he has also earned many international recognition. He describes his journey in developing the first solar steam cooking system in India by taking inspiration from a village woman. He also talked about his involvement in installing the world's largest steam cooking

system which produced upto 50,000 meals per day in Shirdi temple. He also talked about his achievement he received during his journey. Some of the remarkable achievements were Installing the highest altitude steam cooking system in Ladakh, Installing the India's first & largest solar powered air-conditioning system for the Kailash Cancer Hospital and Development of a 430m³ biogas generation, treatment and bottling facility used for community cooking at the Muni Seva Ashram through the company Excellent Renewable Pvt. Ltd. the company of which he was former Chairman. He also talked about the important uses of thermal energy in his plant as well the benefits delivered by their Technologies. Due to his remarkable works he was also recognised by the Clinton Global Initiative Foundation for outstanding work in the areas of renewable energy & social engineering to make the solar cookers affordable to the rural needy through the Smoke-free village projects in A.P. He also talked about his support he is providing to startups which are working in the Clean-Tech Sector. The session ended with the query solved by Mr. Deepak Gadhair of the attendees. The session was fruitful and lightened the audience toward social entrepreneurs and renewable energy.
