“Patent Experience”

09th September 2018

Organized by:

Government Engineering College Patan

At & Po. Kaptur, Dist: Patan, Pin: 384265

Affiliated to GTU Ahmedabad

Web : www.gecpt.cteguj.in

What is Patent :

Patents are a right granted to an inventor that allows them to exclude all others from making, using, or selling their invention for 20 years.

In the U.S. the U.S. Patent and Trademark Office reviews and approves patent applications, which provide protection against others stealing their idea. Once approved, the patent holder is then the sole person or company who is permitted to make, use, or sell the product, process, or solution to a technological problem that they have developed and registered. All others are prohibited, unless they are given permission.

The night before SSIP Sponsored State level workshop on “Patent Experience” was filled with extreme pressure as tumultuous efforts put in for the preparation by the core committee staying up nights for to take some real shape of the next day. SSIP sponsored State Level Seminar kicked off in grand style. Participants turned up in huge numbers and gathered near the registration desk. Committee members played their assigned roles to perfection.

Dr. Amit Patel, IPR Expert Gujarat Technological University came to deliver expert Session on Patent Experience. Around 100 students and Faculty Members have successfully participated in workshop. He took lectures in three different sessions.

In first session, he covered about the basics of patent, types of patent and Intellectual property rights. He also shown various Indian patent as well as US patent.

Second session, he has given lecture on “ How to write patent” and covered various points on patent writing.

In last session, he explained about the prior art search. The workshop was ended by vote of Thanks by Dr. Hitesh Panchal.
