Codeathon: Innovative Thinking

Held on: 04/09/2018

Objective:

The main objective of this technical event is to check the coding ability of the students.

- Outcome Delivery in Deadline
- Techniques to strategies execution
- Execution Tactics
- Analysis of execution

Total **58** students participated in this technical event. During this event students got the idea of how to get into coding competitions. These kinds of events are meant to make the students analyze and ideate in carrying out various projects in association with respective industries. These events give students some idea about how to tackle unseen questions in field of computer programming. They were given freedom of choice of their own programming language.

Glimpse of the codeathon:
