

Report on Celebration of National Science Day@ G20

28th February of each year is celebrated as National Science Day in India to mark the discovery of the Raman Effect by Indian physicist Sir C. V. Raman on 28th February 1928.

The theme of the National Science Day for the year 2023 is "Global Science for Global Wellbeing".

Government Engineering College, Valsad has decided to celebrate the event in accordance to the theme of the National Science day. A Popular Science lecture at District Science Centre Dharampur has been planned for the students of the institute of all branches.

Objectives:

- To make the students aware about the correlation of the Global Science and its importance in the development of technology
- To make the students aware regarding the significance of the Indian Science and its fundamental contribution to the current scientific development.
- To glorify the contribution of the greatest physicist Sir C. V. Raman of the century in India.
-

Popular Science lecture:
