

## A TALK ON

# BUILDING A GREENER FUTURE: NAVIGATING THE PATH THROUGH ENERGY CONSERVATION AND CLEAN TECHNOLOGY

"Clean Technology" is an important topic for technocrats in Chemical, Mechanical and Electrical field as it explores various ways to reduce carbon emissions and transition to a more sustainable energy system.

This includes the development of clean technologies that can promote energy efficiency and reduce our reliance on fossil fuels.

**TUESDAY 25 APRIL, 2023**

5.30 PM Onwards
