

# RESEARCH INTERNSHIP PROGRAM '23

## FOR B.E FINAL YEAR STUDENTS

The Research Internship Program '23 aims to provide exposure to external students by leveraging the expertise of SVNIT's distinguished faculty. This program presents a unique opportunity for students of other institutes to engage with the faculties of SVNIT. This program provides engineering students with hands-on experience in real-world scenarios, improving their project management skills and overall competency. Under the guidance of SVNIT's faculties, students will work on projects spanning diverse subject areas, receiving practical training with laboratory equipment. Ongoing assessment, overseen by SVNIT's faculties, ensures personalized interactions with experts. This industry/project-based initiative integrates fundamental understanding with practical applications, offering valuable learning experiences.
