

About Eureka 4.0

EUREKA is a flagship technical event aimed at fostering innovation, creativity, and problem-solving skills among school students, college students, and working professionals. The event provides a national platform to demonstrate working project models that address real-world problems affecting the common human being. Over the past three editions, EUREKA has received enthusiastic participation and has significantly contributed to promoting applied learning and societal impact-driven innovation.

MOTIVATION

Eureka 4.0 is the fourth installment of the incredibly successful Eureka project demonstration competition. It is an electrifying showcase of ingenuity, technical prowess, and innovation in the realm of electronics hardware.

Objectives

- To encourage innovation and problem-solving using science and technology
- To promote hands-on learning through working models
- To address real-world societal, environmental, and industrial challenges
- To nurture early interest in STEM among school students
- To bridge academia-industry-society through applied research
