

A Workshop on “Web Development”

Kishna School of Diploma Studies & Krishna School of Emerging Technology and Applied Research - Diploma have organized a workshop on “Web Development” for the department of Computer Science & Engineering, Information Technology and Computer Engineering for the Final Year Diploma Engineering Students.

This expert session was delivered by **Mr. Sumit Chawla** (CEO, Venom Technologies, Ultron Technologies).

Topic: **Web Development**

Date: 11th July 2025

Duration: 2 Hours

No. of Students: 90

A workshop on " Web Development" is to teach, motivate, and involve participants in learning about the opportunities, challenges, and responsibilities that come with modern web technologies. It aims to give them the right skills, knowledge, and mindset to keep up with the fast-changing world of web development. The workshop helps learners understand how to use web development in a positive way for society while also being aware of its possible risks.

The speaker clearly explained how web development acts as a bridge between what students learn in school and what is needed in real jobs. It helps participants connect classroom learning with real-world applications in the tech industry.

Topics discussed were:

- Introduction to Web Development
- HTML
- CSS
- Java Script
- jQuery
- Bootstrap

Some glimpses of the Expert Session:

Feedback from Students:

Outstanding response was received from the participants. Students understand the actual meaning and importance of Web Development. This Workshop served as a stepping stone for students.
