

An Expert Session

on

“Beyond Code: The Power of Software Testing in Real Life”

Kishna School of Diploma Studies & Krishna School of Emerging Technology and Applied Research - Diploma have organized an Expert Session on “Beyond Code: The Power of Software Testing in Real Life” for the department of Computer Science & Engineering, Information Technology and Computer Engineering for the 3rd Semester and 5th Semester Diploma Engineering Students.

This Expert Session was delivered by **Ms. Bhumika Pandya** (Software Test Engineer, Rishabh Software).

Topic: **“Beyond Code: The Power of Software Testing in Real Life”**

Date: 18th July 2025

Duration: 2 Hours

No. of Students: 150

An Expert Session on “Beyond Code: The Power of Software Testing in Real Life” is designed to educate, inspire, and actively engage participants in exploring the roles, challenges, and opportunities associated with modern web technologies. The session aims to equip learners with essential skills, practical knowledge, and the right mindset to stay current in the rapidly evolving field of web development. It encourages participants to apply web development responsibly for the benefit of society while being mindful of its potential risks.

The speaker effectively demonstrated how web development serves as a link between academic concepts and the skills required in today’s tech-driven job market. The session helped participants relate their classroom knowledge to practical, real-world scenarios in the technology industry.

Topics discussed were:

- Introduction to Software Testing
- Types of Testing
- Real-world Applications
- Common Tools and Frameworks

- Challenges in Testing
- Career Opportunities in Software Testing

Some glimpses of the Expert Session:

Feedback from Students:

Outstanding response was received from the participants. Students understand the actual meaning and importance of “Beyond Code: The Power of Software Testing in Real Life”. This Expert Session served as a stepping stone for students.
