Brief Report On Expert Session: "From Idea to IP: Building and Protecting Innovation in Healthcare Sciences"

1.	Title	From Idea to IP: Building and Protecting Innovation in Healthcare Sciences
2.	Objective of an Event	1. Create awareness about Intellectual Property Rights (IPR) among students and faculty members. 2. Explain the importance of protecting innovative ideas in healthcare sciences. 3. Familiarize participants with the basic concepts and processes related to intellectual property protection. 4. Provide practical insights into converting innovative ideas into intellectual property assets. 5. Develop an innovation-oriented mindset among students of Pharmacy, Physiotherapy and Nursing. 6. Encourage students to identify and document innovative ideas emerging from academic projects and research activities. 7. Guide the role of intellectual property in research, innovation, entrepreneurship and technology commercialization.
3.	About an Event	The objective is to raise awareness and build understanding of intellectual property, innovation, and the protection of innovative ideas in healthcare sciences. Students and faculty members involved in Pharmacy, Physiotherapy and Nursing are increasingly engaged in academic projects, research activities and innovative ideas. However, awareness regarding intellectual property rights, particularly intellectual property protection, trademarks, patents, and the process of converting an innovative idea into a protectable intellectual asset, is essential for translating such ideas into meaningful outcomes.
