Description of Events	• The SSIP (Student Startup and Innovation Policy) PoC (Proof of Concept) Scrutiny Round is a crucial stage where student innovators present their project ideas and prototypes to a panel of evaluators. • This round aims to assess the technical feasibility, innovation potential, and societal impact of proposed projects before providing financial and mentoring support. • During this round, students pitch their concepts, demonstrate early-stage models, and respond to expert feedback — helping them refine their ideas into impactful solutions.

Learning Outcomes:

- Demonstrate innovative thinking by presenting original solutions to real-world problems.
- Enhance communication skills through structured idea pitching and presentation.
- Understand evaluation parameters used for assessing innovation feasibility and impact.
- Incorporate expert feedback to strengthen their project's design and execution plan.
- Gain exposure to startup and innovation ecosystem and understand the process of availing government support through SSIP.
