

Ideathon – Build your startup idea in 2 days

In the world of startup, all that matters is one idea which can be scalable, sustainable and adaptable. These days looking at the startup ecosystem of India we are on high pace of developing student startup culture at our university. Navrachana University Innovation Studio had invited Mr. Vishnu Nagaraj CEO and Founder Carve Startup Labs (CSL) and Ms. Alisha Davis COO of Carve startup labs to conduct a two day Bootcamp on 28th – 29th January 2023 . We had received around 127 entries of startup enthusiasts and out of which 70 were invited and top 10 pitch decks were given an opportunity to pitch in front of jury for possible funds. 3 – 5 startups will be funded further and handholding mentoring, networking and prototyping support would be given to them. Such events help students to understand the dynamics of startup's right from their college days. This initiative will help student startups to get a runway of 1-2 years before launching their product/service.

Startup ideas which were pitched were ParkeZ, Paper Pencils, Plot my way, Biomed Cultivators, prakruti, Communitie, Jeele Zindagi, kapurramm, Flow and Taste of Gujarat.

Note by vishnu "It was a great experience to do a Startup Bootcamp with the young innovators of NUV. We CSL got impressed with the Startup ideas created by the students and they did all the activities well and pitched the ideas well to the juries. We have seen the commitment of students to creating some impactful solutions to solve global problems and we believe Most of the ideas pitched from NUV will soon become a Startup."
