

Debate Competition on World Entrepreneurs' Day

On 21/08/2023, a Debate was organized for students of Government Engineering College Valsad on World Entrepreneurs' Day. Dr. K. L. Mokariya, Head of the Department, Electrical Engineering, Prof. M. A. Chaudhary, Prof. N. I. Patel and Prof. A. S. Mishal Assistant Professor, Electrical Engineering, coordinated it.

The topics of the debate were: Not everyone can be an entrepreneur, some people are born entrepreneurs, Most start-ups fail For or Against, Self-funding a

start-up is better than taking loans, Entrepreneurship is worth leaving a nine to five job for, We need more entrepreneurs than managers, Experience is the key to successful entrepreneurship For or Against?.

Entrepreneur's Day is a celebration that recognizes the contribution of entrepreneurs to economic development, innovation, and job creation. On this occasion, a debate was organized to discuss the role of entrepreneurs in society, their challenges, and the impact of their endeavors on the economy. The event brought together participants from various backgrounds to express their viewpoints and engage in constructive dialogue.

The Entrepreneur's Day debate provided a platform for participants to express their opinions on the role of entrepreneurs in society. It highlighted the

complexity of the topic, with valid arguments on both sides. Ultimately, the event underscored the significance of entrepreneurship in driving economic growth and societal progress, while also acknowledging the challenges that entrepreneurs face and the need for responsible and ethical business practices.

Debate started with by Head of the Department, Electrical Engineering Department Dr. K. L. Mokariya, who first discussed on key points of Entrepreneurship, and meaning of each topic.

Total 129 students have participated in the session from all departments of government engineering college Valsad. Students actively engaged and acquired valuable insights into entrepreneurship.
