

## Awareness Program for New India Vibrant Hackathon 2023 for Electrical Engineering Students

On 27/09/2023, a session was delivered to Electrical Engineering Students of Government Engineering College Valsad on “Awareness Program for New India Vibrant Hackathon 2023 for Electrical Engineering Students” by Dr. K. L. Mokariya, Head of the Department, Electrical Engineering.

This event aimed to create awareness and promote active participation in the New

India Vibrant Hackathon 2023, specifically targeting students of Electrical Engineering.

The New India Vibrant Hackathon is a nationwide competition that encourages innovation, problem-solving, and skill development among students. It provides a platform for students to showcase their abilities in developing solutions for real-world challenges. The overall objective of this program is to channelize huge amount of youth energy which is currently being underutilised towards engaging them with more constructive agendas and imbibe new skill and attitude to make them problem solver and progressive contributor in civil society at

large. This awareness program was designed to inform and motivate electrical engineering students to participate in the hackathon, which is scheduled in first week of November.

A detailed presentation was given, explaining the objectives and rules of the New India Vibrant Hackathon 2023. The students were made aware of the various categories and the importance of multidisciplinary teams in this competition. An interactive session facilitated the formation of teams. Students were encouraged to collaborate, combining their diverse skills and knowledge in electrical engineering. The key dates, deadlines, and important milestones leading up to the hackathon were outlined, ensuring that students had a clear understanding of the timeline.
