Objective of the event:

To encourage and create awareness about the development and distribution of new products and the provision of new services based on the creation, and exploitation of inventions, trademarks, designs, creative content or other intangible assets. IPR refer to the legal rights given the inventor to protect his invention for a certain time period.

Benefit in terms of learning/ skill/ knowledge obtained (in 150 words)

To encourage and create awareness about the role of IPR to taking invention in market, an interactive session was organised by SSIP cell at L.D College of Engineering on 27/01/2023. The Program targeted to provide opportunities to Undergraduate students, Postgraduate students and Faculty members to expand their knowledge about the role of IPR. It also aims to encourage the students to implement their innovative ideas in to IPR and taking it to market.

After successful completion of interactive expert session, it will helpful for creator to solve out the scalability issues, and product issues to launch the patent model in to the market. The expert started his talk with arising nos of question and tried to give the solution for scalability issues of patent technology also discussed the legal aspects and reduce the risk cover to launch the product in to the market. Also, participants get knowledge about development and distribution of new products and by interaction resolved their queries with respect to scalability of patent product/technology

During the session, the expert had discussed some real time challenges and their solutions about the role of IPR in taking invention to market/commerce. Almost 20 students and 18 faculty members had attended this session. At last, question- answer session had been conducted. Many of the questions were asked by participants. The expert has provided satisfactorily answers of all the asked questions.
