Objective:

- What is Angel Investment?
- What is VC Funding?
- Discuss the Funding Opportunity of Angel investment and V/C Funding for early stage entrepreneurs.
- The objective of this session was to explain the Angel Investment and VC Funding for Early Stage Startup and Entrepreneurs concept to the students that focuses on financial issues related with product development.

Activity Details:

- There was a Expert talk on "Angel Investment V/C Funding Opportunity for Early Stage Entrepreneurs" for 2nd,3rd and 4th year students by Mr. Nikhil Mehta on 28, July 2023 at Seminar Hall, Parul Institute of Technology. 130 students of Computer Science Engineering Department had attended the seminar. Mr. Nikhil Mehta discussed in details Angel investing which involves individual investors, often high-net-worth individuals, who provide capital, expertise, and mentorship to early-stage companies in exchange for equity. Angel investors are typically more flexible in their investment terms and often play an active role in guiding the startup. On the other hand, VC funding involves institutional investors who pool together capital from various sources to invest in startups with high growth potential. VC firms offer larger funding amounts, conduct extensive due diligence, and often require a significant equity stake. VC funding can provide startups with not only capital but also access to valuable networks and resources. Both angel funding and VC funding opportunities are essential for startups, but the choice between them depends on the specific needs and goals of the entrepreneur. After the session, queries of students were taken by the speaker providing them a platform for interaction.

Glimpses of activity:

Mr.Nikhil Mahta is Discuss the Funding Opportunity of Angel investment and V/C Funding for early stage entrepreneurs etc.(Both Images)

Outcome:

Mr. Nikhil Mehta started session listing various funding options available. Then, very nicely with examples he explained various important terms related to the talk. Finally, he talked about Angel Investment and Venture Capital funds, how to apply, eligibility criteria, what not to do while filling applications and various legal concepts associated with the two terms. Overall, session was short but covered important concepts necessary to begin a startup.
