### Activity Details:

On google meet, there was a Mentoring session on “A case study on mentoring support in the vegan food industry” by Mr. Harsh Naik on July 25, 2023. Forty-six students of the Department of Dairy and Food Technology had attended the Workshop. Initially, Mr. Harsh Naik discussed introductory knowledge about vegan food. Additionally, he also discussed various entrepreneurial opportunities in the vegan food industry.

The vegan food industry has experienced significant growth in recent years, driven by an increasing awareness of ethical, environmental, and health concerns associated with animal-based products. As a result, many entrepreneurs and small businesses have entered this market seeking opportunities to contribute to the sustainable and cruelty-free food movement. However, navigating the complexities of the vegan food industry can be challenging, necessitating mentoring and support systems for newcomers. This case study (Report) explores the role of mentoring in supporting and fostering growth within the vegan food sector.

Mr. Harsh Naik guided me about how Startups should continually monitor the market for the potential of the vegan food industry. There was one Question-Answering session and students seemed to be very much interested. He is already an entrepreneur and runs the vegan food industry. In that session, students Gain a lot of new insights regarding types of vegan food and how it differs from dairy foods. We are grateful and with utmost gratitude, and would like to thank Mr. Harsh Naik for executing a mentoring session.
