ACKNOWLEDGEMENT

We are gladly thankful to Director Sir and Principle sir as well as Head of the Department who gave us support to organize the seminar on this important topic in civil engineering “**National technology day**”. report report is a summary of technologies. It gives you an overview of the technologies nowadays.

GENERAL INFORMATION

This seminar on the topic “National technology day” was arranged on dated 11th May 2023 . It acknowledges technological advancements and their impact on society, highlighting the country's achievements in science and technology. The seminar was organized for students of final year Degree. Around 25+ students attended this seminar.

PURPOSE OF SEMINAR

The day aims to recognize the contributions of scientists, engineers, and innovators who play a crucial role in advancing technology.

Additionally, it promotes a culture of innovation and emphasizes the importance of technological advancements in addressing societal challenges.

So we decided to aware the students to inspire the younger generation to pursue careers in science and technology, fostering a spirit of creativity and progress.

WHAT DID WE LEARN?

The seminar was started on 11th May 2023. Prof. D.K.Trivedi gave basic information regarding the day and gave detailed information about the technology advancement.

It provides you with experiences, lessons, and the tools you'll need to get a full-time work in the future. It also helps in various ways of the carrier path of students.

One of the most important things you can gain from this seminar is new found knowledge. This can include knowing how to fulfil tasks that are relevant to your desired career path and sharpening the skills that you already possess.

CONCLUSION

From this seminar, Participants got aware of the technology and got an idea about the work that have to do in future.

From the internship, they will develop professional skills and ethics based on industrial problems and will learn how to effectively plan to execute the work within a definite time frame. They will also learn to design efficient technical solutions to industrial problems and find solutions related to project and finance management.

Thank You
