

Report of the Activity

"Design for Posthuman Neurotechnologies" by Dr. Leslee Lazar

Date: 22/09/2023

Venue: Karnavati University Campus

Time: - 3:30 PM – 5:00 PM

Number of Participants: - 146

Department of Communication Design of UID at Karnavati University along with IIC, KIIF and SSIP organized a seminar on September 22, 2023, Dr. Leslee Lazar, Assistant Professor at the Department of Centre for Cognitive and Brain Science, IIT Gandhinagar, delivered a thought-provoking session on "Design for Posthuman Neurotechnologies." named ABHIGAM - An Approach Towards Innovation.

Dr. Leslee Lazar, an Assistant Professor renowned for her work in the field of cognitive and brain science, brought a wealth of knowledge and expertise to the session. Her background in the interdisciplinary study of neuroscience and design made her a fitting speaker for the topic.

The session delved into the speculative realm of the posthuman future, exploring the intersection of design and cutting-edge neurotechnologies. The speaker provided a comprehensive overview of the latest advancements in neurotechnology. This included discussions on brain-machine interfaces, neural implants, and other emerging technologies that are revolutionizing the way humans interact with machines.

Dr. Lazar highlighted the critical role of design in shaping the future of posthuman neurotechnologies. The discussion touched upon the ethical considerations, user experience design, and the need for a human-centric approach in the development of these technologies.

The event was held as part of the ABHIGAM initiative, emphasizing the commitment of IIT Gandhinagar to knowledge integration and innovation. The initiative aims to foster a culture of interdisciplinary collaboration and forward-thinking approaches to address challenges in various domains of Technology development.
