

## **One-Day Hands-on Training Workshop on 3D Printing**

Department of Mechanical Engineering has organized a one-day hands-on training workshop on "Introduction to 3D Printing" for first-year B.Tech. students, under the initiative of SSIP 2.0. The students have learned the concepts of 3D printing technology, through hands-on training, and gained practical experience in operating 3D printers, designing simple objects using CAD, and understanding the workflow from digital model to physical object. This workshop not only equips students with valuable technical skills but also fosters their creativity, problem-solving abilities, and innovation mindset.
