

SSIP2.0 Sensitization Sessions

Event Name:	Design thinking for Innovation and Start-up
Date:	27-07-2024
Venue/ Mode:	Seminar Hall, Government Science College Zalod / Offline
No of Participants:	12
Speakers Name :	Dr. Bijoy N Roy

About Event:

A seminar on Design Thinking and Innovation was organised specially for the students at Government Science College Zalod on 27th July, 2024. SSIP Coordinator of the college, introduced the idea of Design Thinking and how it is essential for Innovation. The basic difference between our normal thinking process and design thinking process, for searching a solution to any problem, was explained.

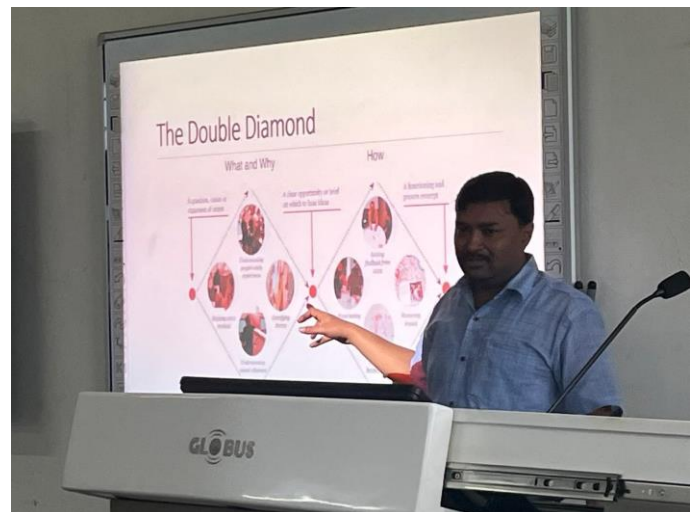

Students were given an exercise to provide ideas to start a new business with using a smart phone and internet connection. They came out with a number of different ideas from which they were asked to settle down on any one workable idea as per the available condition. Through this exercise the way of working of design thinking was explained. The importance of selecting a proper problem was also discussed. The requirement of empathy was highlighted. The concept of double diamond approach in selecting problem and then choosing a solution was explained. The students were asked to observe their vicinity near their home place and list down the identified problems, so that using design thinking method they could later search out innovative solution. Students felt motivated with the inputs of the seminar.

Outcome of Event:

At the end of the seminar, the students could recognise the design thinking method and its application towards innovation.

The activity session made the students understand the design thinking technique for creating innovative solutions.
