

## Event Report: Induction Program on SSIP 2.0 for First-Year Students

Government Science College, Veraval

Date: August 2, 2024

---

**Event Overview:** An induction program was organized on August 2, 2024, at Government Science College, Veraval, aimed at introducing first-year students to the *Student Startup and Innovation Policy (SSIP) 2.0*. The event was specifically designed to create awareness and provide insights into the opportunities SSIP 2.0 offers for fostering innovation and entrepreneurship among students.

**Objective:** The primary goal of the event was to familiarize first-year students with the objectives, scope, and benefits of SSIP 2.0. It also aimed at encouraging students to think innovatively and leverage the available resources under the policy for developing their startup ideas and projects.

**Speaker:** The session was delivered by *Mr. Pradeepsinh Jadeja*, SSIP Coordinator of the college. He effectively engaged the students, explaining the SSIP 2.0 framework, its various funding opportunities, and how students can avail support for their innovative projects.

**Participation:** A total of 51 students participated in the event, including 31 male students and 20 female students. The interactive nature of the session helped trigger innovative thinking in some of the participants, who expressed their interest in exploring potential startup ideas under the guidance of the SSIP program.

### Key Highlights:

- Introduction to SSIP 2.0 and its role in promoting student startups and innovation.
- Explanation of the support mechanisms available under SSIP 2.0, including financial and mentorship aid.
- Interactive Q&A session where students discussed potential projects and ideas with the coordinator.
- Encouragement of students to take part in future workshops and seminars related to innovation and entrepreneurship.

**Outcome:** The session successfully raised awareness of the SSIP 2.0 policy among the first-year students. Several students showed interest in pursuing innovative projects, marking the beginning of their journey toward becoming future innovators. The event also set the stage for more such interactive sessions in the coming months.

---

**Conclusion:** The induction program was a significant step in fostering an innovative mindset among the new batch of students. With continuous support from the SSIP initiative, students are expected to develop creative solutions to real-world problems, enhancing their entrepreneurial potential.
