A Report on Hackathon Under SSIP 2.0

Hackathon is an intensely focused working event stakeholders to address a particular challenge or problem prevailing in society. The participants work together to meet project parameters quickly and efficiently. With this motto Government Law College organized **a workshop on Problem Identification and Interclass Idea Hackathon on 24th September, 2024.** The workshop was based on Ikigai Method and make students realized about their likings and earning prosperities. During the workshop support and guidance was provided to the students of this college in identifying problems and how to prepare Intent proposal for their idea. At the end of this activity SSIP Cell was successful to motivate students for becoming job giver instead of job seeker. As a result of this Hackathon participation the college has received concept application for Starting “Egg Incubator” by third year student of this college. The college will soon call the interested students to present the POC.

In addition to this, we have received **two** Concept Applications (relating to legal field i.e. IP, Recovery) from two alumni students for which college is going to conduct Pitching Program in the month of October.

The Brochure of the workshop:
