Report on the Session: " Strengthening IIC Linkages with ATLs and SICs in Schools - 2024"

On July 31, 2024, Gujarat Technological University (GTU) hosted a session organized by the Management and Innovation Council (MIC) titled "Strengthening IIC Linkages with ATLs and SICs in Schools - 2024." Led by Mr. Dipan Kumar Sahu, the session offered a detailed overview of the framework designed to engage and develop faculty members as Innovation Ambassadors.

In Quarter IV of IIC 6.0 (2023-2024), MIC-driven activities aimed to enhance collaboration among IIC institutions, Atal Tinkering Labs (ATLs), and School Innovation Councils (SICs). The initiative focused on establishing a comprehensive mentorship framework, empowering both faculty and students as Innovation Ambassadors (IAs). Key activities included reinforcing linkages for resource sharing, initiating joint innovation programs, and developing a structured mentorship program to support innovation efforts. The session emphasized the crucial role of IAs in driving innovation and entrepreneurship and aimed at creating a cohesive ecosystem that bridges higher education and school-based innovation.

The session underscored the significance of building a strong network of trained faculty who can effectively mentor and guide students, thus strengthening the innovation ecosystem within higher education institutions.

Attended by five faculty members and 43 students, the session reflected a strong commitment to fostering innovation at GTU. The insights shared by Mr. Sahu are expected to significantly enhance the university's efforts in developing a dynamic and supportive environment for innovation and entrepreneurship.
