

Report on Innovative Project Ideas of Electrical Engineering for Viksit Bharat

The "Viksit Bharat" initiative aims to promote sustainable development and enhance the quality of life in rural and urban areas across India. The program focuses on leveraging innovative project ideas that can address local challenges and improve socio-economic conditions. The Viksit Bharat initiative is poised to transform India through innovative project ideas that focus on sustainability, community empowerment, and technological integration. By addressing local challenges and leveraging local resources, these projects can significantly contribute to the nation's development goals.

On 14-10-2024, the SSIP cell organized a program to discuss **Innovative Project Ideas of Electrical Engineering for Viksit Bharat** in the Electrical Engineering Department to Celebrate **"Vikas Saptah"**. The program was conducted by Mr. A. K. Damor, Lecturer in Electrical Engineering. Total of 22 students participated and exchanged their ideas.

Glimpses of the Event:
