

“Talk show with successful startups”

The Government Polytechnic Kheda has organized “Talk show with successful startups” on 7th October 2024 under the “Vikas Saptah” for the celebration of 23 years of visionary leadership of prime minister of India. We have invited Mr. Chetan Patel , Secretary of SRISTI (Society for Research and Initiatives for Sustainable Technologies and Institutions) for an expert talk on Successful Startups & Entrepreneurs from the rural areas. He talked about the journey of successful startups and entrepreneurs who invented the product or found innovative solutions from their day to day life problems. All these entrepreneurs were non-technicals and their level of education was below 10th standard. He has shown a practical demo to spark the concept of creating thinking from a simple day life problem. He shared a story of a number of different innovations from the rural and illiterate innovators. Total 108 students and 16 faculties attended the seminar.

The programme was extremely useful to our budding Students, it has given them practical exposure to problem-solving approaches. The hard effort of IIC President Dr. Pinkesh R. Shah and SSIP Coordinator Shri A. V. Prajapati under the guidance of Principal P.R. Dave sir made the event more successful.
