Place: A-211, Seminar Hall

Brief Outline of the session:

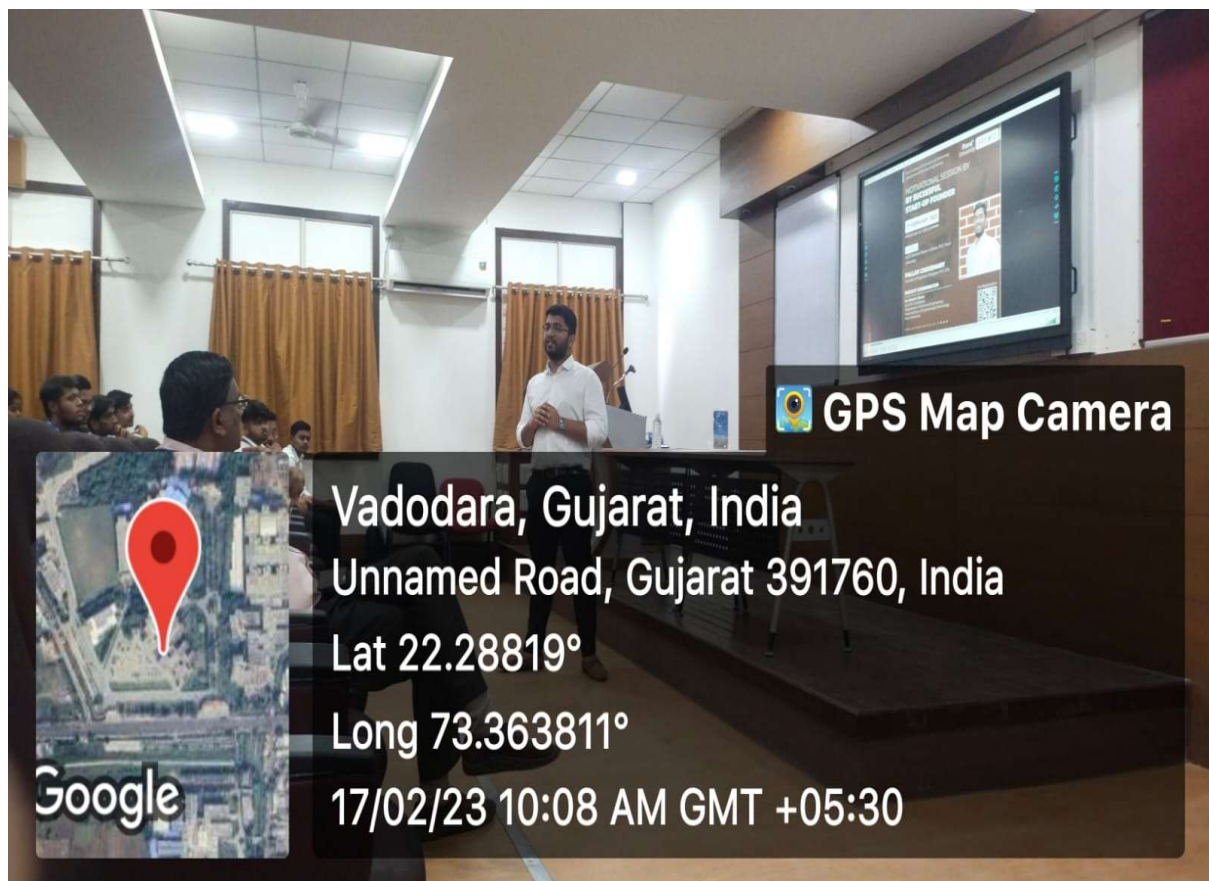

The Institute Innovation Club, Entrepreneurship Development centre Parul University conducted a session on success story - Motivational Session by Successful Entrepreneur for students of Electrical Engineering Colleges in A-211, Seminar Hall on 17th February, 2023. The objective of this talk is to motivate students, give them an idea of the EV sector, and help them become successful entrepreneurs.

We know that electric vehicles are gradually becoming popular in the Indian market. However, the infrastructure for EVs in the country is still in a nascent stage, and there's a long way to go. To boost the EV ecosystem in India, several new-age private players are working incessantly in tandem with government

agencies and other industry leaders. One such company is Hyperion Chargers PVT. LTD. dealing with EV chargers.

Our students are the future of India, and as electrical engineers, they are looking forward to a bright future in the EV sector. The young brain has new, innovative ideas and is more attracted to the EV side. The talk will motivate students, give them an idea of the EV sector, and help them become successful entrepreneurs. The book gives them only knowledge of how EVs work, but this session shows them how you can make EVs and how to convert their ideas into useful products for society.

GLIMSES OF THE SESSION

Thank You
