Program Report

Introduction: On February 11, 2023 (Saturday), a seminar was organized on "Startup and Entrepreneurship Opportunities in the Field of Computer & IT Engineering" at B & B Institute of Technology. The seminar was aimed at providing students and professionals with insights into the world of entrepreneurship and startups in the field of computer engineering. The seminar featured prominent speakers from the industry who shared their experiences and provided guidance to aspiring entrepreneurs.

Speakers and Topics: The seminar featured two prominent speakers from the field of computer engineering, who spoke on various topics related to entrepreneurship and startups. The first speaker was Mr. Brijesh Babaria, Founder and MD, Glysis softwarre pvt. Ltd., who talked about the challenges and opportunities in the startup ecosystem. He shared his journey of building a successful startup in the field of computer engineering, which motivated the participants to take the entrepreneurial path.

The second speaker was Dr. Maulik Pandya, Founder, Webial Technology Pvt. Ltd. a seasoned entrepreneur who spoke on the importance of innovation and problem-solving skills in building a successful startup. She emphasized the need for entrepreneurs to identify and solve real-world problems using technology. He also talked about the importance of staying updated with the latest trends and technologies to stay ahead of the competition.

Panel Discussion: The seminar also featured a panel discussion, which was moderated by Prof. Kaushal Mistry, a renowned business consultant. The panel comprised of the two speakers, along with two other successful startups from the field of computer & IT engineering. The panel discussed various topics related to startups and entrepreneurship, including funding, team

building, market research, and business strategy. The participants also had the opportunity to ask questions and interact with the panel members.

Key Takeaways: The seminar provided the participants with several key takeaways, which include:

- Importance of innovation and problem-solving skills in building a successful startup

- Need for staying updated with the latest trends and technologies in the field of computer engineering

- Importance of team building and finding the right talent for the startup

- Understanding the market and conducting market research before launching the startup

- Fundraising strategies and sources of funding for startups

Conclusion: The seminar was a great success and provided valuable insights to the participants on the world of entrepreneurship and startups in the field of computer engineering. The seminar helped the participants to understand the challenges and opportunities in the startup ecosystem and motivated them to take the entrepreneurial path. The organizers are planning to organize similar seminars in the future to provide more guidance and support to aspiring entrepreneurs.

The program was coordinated by Prof. Kaushal Mistry, Lecturer, Computer Engineering Department. 83 Nos. of students of final year Computer and IT department was participated in the seminar.
