

Event Title

Event Name: Expert Talk on “Role of Innovation in Automotive Industry”

Date: 29/01/2025

Venue/ Mode: Room No. 603, Mechanical Engineering Department, LDCE

No of Participants: 104 students

Speakers Name : Mr. Shoaib Nagamiya

About Event:

Second year students of Mechanical as well as Robotics and Automation engineering branch had interaction with the expert. Our distinguished speaker provided an in-depth analysis of the latest trends and innovations driving efficiency, safety, and sustainability in automotive design, production, and operations. The talk also highlighted the critical role of research and development, collaboration across sectors, and how companies are leveraging innovation to meet evolving consumer demands and global environmental challenges. Students thoroughly interacted with the expert and availed benefits in terms of overall objective set up for future endeavors. The session was ended with question answer session along with instant gesture of vote of thanks from the students group that showcases their interest, courage, and self confidence building.

Outcome of Event: To explore emerging trends and understand the latest technological advancements shaping the automotive industry, including electric vehicles, autonomous systems, and connected technologies. To highlight the importance of innovation.
