APICULTURE WORKSHOP

Government Science College

On February 20, 2025, a workshop on Apiculture was organized at the Government Science College, Jasdan. The program was coordinated by R.K. Katara, SSIP Coordinator, under the auspices of the Student Startup and Innovation Policy (SSIP).

The event drew a significant attendance, with 41 students, 5 teaching staff, and 4 non-teaching staff present. To inspire the students, Mr. Kamlesh Patel, an expert in Apiculture from Navodaya Farm Honey, was invited as the guest speaker.

The program commenced with a welcome speech by Dr. Sapna Pal, Assistant Professor of Zoology. Dr. B.J. Gangani warmly welcomed Mr. Patel with a floral bouquet. R.K. Katara then briefed the students on the SSIP initiative and its facilities.

As Mr. Patel took the stage with his Beehive box, the audience eagerly anticipated his presentation. He shared insightful knowledge about bees, apiculture, and various lesser-known aspects of beekeeping. Additionally, he provided guidance on entrepreneurship and business startups.

Mr. Patel's engaging presentation style and anecdotes about his experiences with schools, colleges, and his career captivated the students and staff. The attendees were also treated to a honey-tasting session, featuring two distinct flavors: regular and Ajwain.

The program concluded with a vote of thanks delivered by Dr. Sapna Pal. Refreshments were provided for the students, staff, and guests. The SSIP event was executed smoothly, leaving everyone inspired and motivated.
