

Workshop on Entrepreneurship Skill, Attitude And Behaviour Development

On 17/02/2023, a session was delivered to students of Government Engineering College Valsad on “Entrepreneurship Skill, Attitude and Behaviour Development”

by Prof. R. C. Malan, Head of the Department, Applied Sciences and Humanity, and President of IIC.

Objective of the workshop was to develop the spirit of entrepreneurship in the participants, discussion on how they can develop the enterprise out of their innovative idea and became an entrepreneur. To become an entrepreneur what skill are required, what should be the attitude and behaviour.

Workshop started with welcoming the speaker Dr. R. C. Malan and Head of the Department, Electrical

Engineering Department Dr. K. L. Mokariya. Dr. K. L. Mokariya has encouraged the students for participation in the workshop and talked about importance of this workshop. Then workshop Coordinator Prof. N. I. Patel has invited Dr. R. C. Malan

to deliver the session.

Dr. R. C. Malan has started with the discussion of innovations, then he has discussed about the different skill sets that is required to become an entrepreneur. He has linked the skill sets of entrepreneur with the student life so that they can better understand the terminologies. How students can become the entrepreneur, what should be the attitude and behaviour that was explained at the end.

At the end of the workshop Dr. K. L. Mokariya has explained various government schemes related to entrepreneurship.

Total 42 students have participated in the workshop from Electrical Engineering, Chemical Engineering, Mechanical Engineering departments. Students have made the interaction and gained knowledge about entrepreneurship and skills required.
