Vadodara Kidovation Festival 4.0

ACTIVITY TYPE	Vadodara Kidovation Festival 4.0- Workshops, competition, Seminar, Bootcamp.		
DATE & TIME	12th–13th August 2025	Duration	2 Day
SEMESTER	All	No. of participants	530
EXPERT NAME WITH DESIGNATION	Mr.Manish Jain,Himansu Das, Harsh Kotak.		

Introduction

The **Vadodara Kidovation Festival 4.0** was organized as a unique outreach initiative to promote creativity, innovation, and entrepreneurship among school students. With the belief that *“The earlier, the better—there is no particular age to start innovating”*, the festival brought together students from **21 different schools across Vadodara**.

The two-day festival was designed as a blend of **competitions, workshops, and exhibitions** to give students an opportunity to learn by doing. More than **500 students** participated in hands-on activities, ranging from robotics and rocket launches to design thinking and entrepreneurship challenges.

The atmosphere was vibrant, filled with the energy of young innovators eager to showcase their ideas and creativity. Students collaborated in teams, experimented with materials, built prototypes, pitched business ideas, and learned the fundamentals of problem-solving in an engaging way.

The presence of **Mr. Manish Jain, Teaching Professor at IIT Gandhinagar and Principal Coordinator at the Centre for Creative Learning**, as **Chief Guest**, added immense value. His **special workshop on “Creativity in Innovation”** inspired students to think differently and embrace curiosity as the foundation of innovation.

Objective

The primary objective of the festival was to provide a dynamic platform where school students could **explore innovation through hands-on learning, problem-solving, and teamwork** while nurturing an entrepreneurial and creative mindset from an early age.

Learning Outcomes

- Students developed creativity, critical thinking, and collaboration skills.
- They gained exposure to practical applications of science, design, and entrepreneurship.
- They experienced confidence-building through pitching, presenting, and public interaction.
- They learned to apply empathy and design-thinking in solving real-world challenges.
- The event nurtured curiosity and demonstrated the joy of innovation and experimentation.

Chief Guest Session

The festival was inaugurated with the presence of **Mr. Manish Jain**, Teaching Professor at **IIT Gandhinagar** and **Principal Coordinator – Centre for Creative Learning**.

Mr. Jain conducted a **special workshop on “Creativity in Innovation”**, where he engaged students with interactive tasks and storytelling. His session emphasized the importance of curiosity, imagination, and hands-on exploration in building innovative solutions. Students actively participated, asked questions, and enjoyed activities that challenged them to think beyond textbooks. The session was one of the most impactful highlights of the festival.

Event Highlights & Student Participation

1. Teen Tycoons

Students became “young entrepreneurs” by presenting innovative business ideas. They worked in teams to identify problems, brainstorm solutions, and pitch them as startup ideas. The activity simulated a real entrepreneurial journey—idea generation, validation, and presentation. Students enjoyed role-playing as business leaders and confidently showcased their creativity, which impressed both peers and mentors.

2. Robotics

The robotics challenge brought excitement and curiosity. Students used robotics kits to design and program their own robots. They experimented with navigation, obstacle challenges, and coding logic. For many, this was their first experience with robotics, and the thrill of watching their robots come alive created a sense of accomplishment. The event encouraged teamwork, trial-and-error learning, and joy of experimentation.

3. ChemDrive Challenge

Students applied science in action by building cars powered by chemical reactions. Teams tested different combinations to generate propulsion and raced their cars on tracks. The challenge was lively, with cheering and laughter as students saw their creations move. Many teams improvised designs to improve speed and stability, turning the event into both a science experiment and a playful competition.

4. Pack It Perfect!

This design challenge encouraged students to rethink product packaging. Participants received items and were tasked to create the most efficient, safe, and innovative packaging solutions. They experimented with folds, eco-friendly designs, and creative presentation. Students enjoyed showcasing practical yet imaginative solutions, highlighting how design can make everyday products safer and more attractive.

5. Wood Craft Workshop

In this hands-on workshop, students worked with wood to create small artistic and functional objects. Many crafted stands, toys, or creative showpieces. Handling tools and materials gave them a new learning experience beyond the classroom. The activity encouraged patience, concentration, and artistry, and students were proud to take their handcrafted creations home.

6. Champ a Lamp

This event combined art and utility. Students designed lamps using simple materials, experimenting with structure, light placement, and decoration. The joy of lighting up their own lamp designs was visible on their faces. The event nurtured creativity and gave students the satisfaction of producing something useful and beautiful.

7. Innoverse Expo

The expo was a platform for students to display their innovative projects and prototypes. Participants proudly explained their ideas to judges, visitors, and peers. The interaction boosted their confidence and presentation skills. From science models to innovative product designs, the expo reflected the talent and creativity of young minds.

8. Rocket Rangers! The Science of Rockets

One of the most thrilling events, students built and launched model rockets. They learned principles of aerodynamics, propulsion, and balance through hands-on trials. The excitement of countdowns and successful launches filled the atmosphere with applause and cheers, making this event a festival favorite.

9. Creative Learning Workshop

This workshop was filled with fun activities, puzzles, and group tasks designed to encourage imagination and teamwork. Students collaborated on solving problems and enjoyed playful exercises that tested their creative thinking. The light-hearted approach to learning made this workshop a refreshing and memorable experience.

10. Design Thinking Wallet Challenge

Students explored the process of design thinking by creating user-centered wallets. They interviewed peers, identified user needs, developed prototypes, and presented their creative designs. The interactive and playful process helped them understand empathy in design. Students enjoyed building unique wallets and proudly shared their results.

Conclusion

The **Vadodara Kidovation Festival 4.0** successfully brought together **21 schools** and more than **500 students** in a celebration of creativity, innovation, and teamwork. The festival offered a perfect blend of science, design, entrepreneurship, and hands-on workshops, ensuring holistic learning beyond the classroom.

The presence of **Mr. Manish Jain** as Chief Guest enriched the festival, with his **Creativity in Innovation** workshop leaving a deep impact on participants. Students not

only learned but also enjoyed every moment, proving that innovation is most powerful when it is fun and engaging.

The festival truly fulfilled its mission of nurturing the next generation of problem-solvers, dreamers, and innovators by proving that *“There is no particular age to start innovating.”*
