| <b>Number of Participants :</b>     | 307+   |
| <b>Student chapter Association:</b> | SSIP BVM   |

## Objectives of the Event:

The founder interaction session was organized with the following objectives:

- To motivate students to convert academic projects into viable startup ventures
- To provide first-hand entrepreneurial experiences from Shark Tank India featured founders
- To guide students on idea pitching, innovation, and startup funding
- To promote a culture of entrepreneurship and innovation among engineering students

## About the Event:

On **7th January 2026**, SSIP Cell – BVM successfully organized an interactive founder session titled “**From Project to Startup!**” at **Auditorium, BVM**, starting at **2 PM**. The event witnessed enthusiastic participation from students eager to understand the real-world startup journey.

The session followed an interview-based format, facilitating a candid dialogue on conviction, execution, and R&D. The session featured **Mr. Rutvij Dasadia**, founder of **Booz Mobility**, who shared his experience of developing EV-based micro-mobility solutions aimed at improving campus transportation. He discussed ideation, prototype development, market validation, and challenges faced during scaling the startup.

The second speaker, **Mr. Raj Shah**, Co-Founder of **WeHear**, elaborated on how his team developed patented bone-conduction technology to address hearing healthcare challenges. He emphasized social innovation, problem-solving approaches, and the importance of persistence, which eventually led to recognition and funding through **Shark Tank India**.

The event concluded with a **15-minute interactive Q&A session**, where students actively engaged with the founders by asking questions related to pitching strategies, startup failures, funding processes, and entrepreneurial mindset.

## Outcome of the event:

The session proved to be highly informative and motivational. Students gained practical insights into transforming engineering projects into startups, understanding market needs, pitching ideas, and building sustainable businesses. The interaction helped students bridge the gap between technical education and entrepreneurship.

## Glimpses:
