

## Department: E-Cell VGEC

### Event Name: Transforming Innovative Ideas into Protected & Market-Ready Solutions

On 23 Jan. 26, the Entrepreneurship Cell (E-Cell) of Vishwakarma Government Engineering College (VGEC), Chandkheda organized an informative and industry-oriented expert session on “**Transforming Innovative Ideas into Protected & Market-Ready Solutions**”, delivered by **Krupalsinh Dabhi**. The session focused on helping students understand how innovative ideas can be legally protected and successfully converted into commercially viable products. Mr. Dabhi explained the importance of Intellectual Property (IP) in today’s innovation-driven ecosystem and guided students through the basics of patents, copyrights, and design registration. Through real-world examples and startup case studies, he highlighted how proper IP strategy plays a crucial role in building sustainable startups and protecting original ideas from misuse.

The session provided valuable insights into the complete IP-to-market journey, enabling students to recognize innovation not just as idea generation, but as a structured process involving protection, validation, and commercialization. Mr. Dabhi emphasized that safeguarding intellectual efforts is essential for long-term entrepreneurial success and encouraged students to be proactive in securing their innovations at an early stage. The interactive nature of the session helped participants gain clarity on legal aspects often overlooked during early-stage innovation. The expert talk inspired students to think beyond ideation and focus on transforming their solutions into market-ready and legally secure ventures.

#### Key features:

- **Expert Speaker:** Mr. Krupalsinh Dabhi
- **Event Title:** Transforming Innovative Ideas into Protected & Market-Ready Solutions
- **Venue:** J Block Auditorium, VGEC
- **Date & Time:** 23/01/2026, 11:00 am to 12:00 pm
- **No. of Participants:** 90+ students
- **Organized by:** VGEC E-Cell
- **Faculty Coordinators:** Prof. Rozina R. Surani, Prof. Chetna G. Chand

#### Discussion Points:

- Introduction to Intellectual Property (IP) and its significance
- Basics of patent, copyright, and design filing
- Importance of legally protecting innovative ideas
- Commercialization strategies for student innovations and startups
- Real-world case studies highlighting successful IP-driven ventures
