

Report on Incubation Centre Visit of the students of GP, Waghai

Electrical Department organized Incubation Centre Visit of the students of GP, Waghai on 08/01/2026 at Electrical Department, H120. Prof. M. A. Chaudhari started the visit at 11:00 am with a welcome session. Prof. M. A. Chaudhari were given a brief review of the incubation centre's mission, programs, and success stories and Objectives of To understand the role of incubation centres in nurturing startups. To learn about facilities and resources provided (mentoring, funding, infrastructure). To gain practical insights into innovation and entrepreneurship. Detailed discussion was done about various electrical experiment set ups insight and some innovative projects and various electrical components and sensors used. Total 11 students and 1 staff member were present on the visit.

The visit was highly beneficial, offering real-world exposure and encouraging students to consider entrepreneurial pathways in addition to traditional career routes. Recommendations include future workshop collaborations with the incubation centre. At the end of the event staff and student of GP Waghai appreciated the team of electrical department and exposure they have gained from the visit.
