DAY 2

Field Visit

Dental Checkup

REPORT

The Department of Pediatric and Preventive Dentistry in collaboration with the Department of Orthodontics and Dentofacial Orthopedics, NPDCH, SPU, organized a School Oral Health Camp on 13th September 2025 at Sainik School for students from Standard 6 to Standard 9. The initiative was designed to promote oral health awareness, provide preventive care, and encourage healthy dental practices among school-going children. The event commenced with a warm felicitation by our respected Dean, Dr. Vilas Patel, whose presence motivated both the faculty and students. Following the inauguration, the dental team conducted an oral health awareness session, where students were educated on the importance of maintaining good oral hygiene. Special emphasis was laid on dental trauma and sports-related injuries, highlighting the role of mouth guards in preventing dental fractures during physical activities. The session also included insights into SSIP (Student Start-up and Innovation Policy) and the scope of start-ups in healthcare, aiming to inspire young minds to innovate in the field of dentistry. The session concluded with a group photograph, marking the success of the event and the enthusiasm of the students. After the awareness program, students actively participated in a field trip experience, followed by a comprehensive dental check-up conducted by faculty and postgraduate students. Individual consultations were provided, and oral health status reports were recorded for each participant. To ensure continuity of care, students visit was scheduled for 24th September 2025 (Wednesday). On this day, the dental team revisited Sainik School to provide necessary treatments and further check-ups based on the initial findings. This revisit strengthened the preventive approach of the program and emphasized the department's commitment to long-term student welfare.
