Celebration of National Energy Conservation Day

14 December 2026

SSIP Activity Report: Celebration of National Energy Conservation Day

National Energy Conservation Day is observed every year on 14th December across India to promote awareness about energy efficiency and sustainable practices. In this context, an SSIP activity was organized at Bahauddin Arts College, Junagadh, as a pre-celebration of the day under the SSIP initiative.

The program aimed to sensitize students towards the importance of energy conservation and to encourage innovative thinking in the area of sustainable energy solutions. As part of the activity, students actively participated in group-based presentations where they showcased creative and innovative ideas focused on the conservation and sustainable utilization of natural energy resources such as solar, wind, and water energy. The activity fostered teamwork, critical thinking, and problem-solving skills among the participants.

An engaging component of the program was the administration of self-composed innovative pledges by each group, reflecting their commitment to energy conservation and responsible environmental practices. These pledges highlighted the students' awareness and their willingness to contribute towards a sustainable future.

A total of 65 students actively participated in the event, demonstrating their enthusiasm and interest in innovation and sustainability under SSIP.

The program was organized under the guidance of the Principal, Dr. J. R. Vanza, by the SSIP Coordinator, Dr. Dipika Kevlani, along with her team. The Chairperson of the event, Dr. P. V. Barasiya, appreciated the students' active involvement and provided valuable insights on startup opportunities in the field of energy conservation, motivating students to transform their ideas into viable projects under SSIP.

Faculty members Dr. Dina Lodhia, Dr. Bharat Rathod, and Prof. Bhavik Chavda were also present and encouraged students throughout the activity, contributing to the overall success of the program.

The event successfully created awareness about energy conservation while inspiring students to think innovatively and explore entrepreneurial opportunities in sustainable energy under SSIP.
