Report on Celebration of World Entrepreneurs Day

Date: 21/08/2025

Government Science College, Limkheda, celebrated World Entrepreneurship Day on 21 August 2025 with the aim of nurturing an entrepreneurial mindset among students and connecting classroom learning with real-world opportunities. The event was jointly organized by the Innovation Club, Institution's Innovation Council (IIC), and the SSIP Cell, with the support of the Atal Innovation ecosystem. The theme "**Ideate • Innovate • Initiate**" captured our objective to help students move from ideas to action in a structured, ethical, and sustainable manner.

The Innovation Club conducted awareness drives in classrooms and laboratories, introduced basic concepts such as problem identification, design thinking, and business model building, and invited registrations for the idea-pitch competition. Posters, social media posts, and class announcements ensured wide participation, especially from first-generation learners in and around Limkheda.

The coordinator emphasized how the National Education Policy encourages innovation, internships, and interdisciplinary learning, and urged students to convert their project work into prototypes and ventures that can add value to the local economy, especially in tribal and rural communities. In essence, the celebration of World Entrepreneurship Day transformed our campus into a living lab of ideas and initiative. It bridged theory and practice, connected students with mentors and enablers, and set a clear roadmap. As Government Science College, Limkheda moves forward, we remain committed to cultivating entrepreneurs who are scientifically informed, socially conscious, and capable of building resilient ventures for our region and beyond. Total 24 students remained present in this event.

Co-ordinator (Innovation Club & SSIP)

Mayank L Damor

Principal
Government Science College
Limkheda, Dist. Dahod
