Report on Exposure Visit to Incubation Center at PDEU, Gandhinagar

On 4 February 2026, the Innovation Club and SSIP 2.0 cell of GSC Vadnagar organized an industrial exposure visit to the Innovation and Incubation Centre (IIC) at Pandit Deendayal Energy University (PDEU), Gandhinagar. A group of 42 students from various science streams, accompanied by two faculty coordinators, participated in this visit. The primary objective of this visit was to bridge the gap between theoretical science and entrepreneurial application. The program aimed to inspire and educate students about entrepreneurship, innovation, and the startup ecosystem.

The students assembled in the college campus at 7:30 am and with full enthusiasm boarded the bus and reached PDEU campus by 10:30 am. Upon arrival, the students were welcomed by the IIC management team. An intensive orientation session was conducted by the Incubation Manager Ms. Mansi Patel and Mr. Prasanna Parikh, focusing on the following core areas:

- **Ideation to Market:** Students were introduced to the lifecycle of a startup, emphasizing how a simple classroom project can be converted into a **Minimum Viable Product (MVP)**.
- **SSIP & Government Support:** Detailed insights were provided regarding the **Student Startup and Innovation Policy (SSIP)** of the Government of Gujarat, explaining how students can avail of grants for prototyping and patent filing.
- **IPR Awareness:** A brief session on Intellectual Property Rights (IPR) helped students understand the importance of protecting their original research and designs through patents and trademarks.

The session included interactive elements, allowing students to clarify doubts and discuss their own startup ideas. Later, the **Director IIC, PDEU, Mr Abhinav Kapadia**, also interacted with the students and motivated them to continue thinking and finding solutions to existing problems. The event was meticulously organized and coordinated by **Dr. Neha A. Nandkeolyar**, Coordinator of the Innovation Club and SSIP. The entire initiative was conducted under the able guidance and patronage of the Principal, **Dr. P.S. Patel**, whose continuous support is instrumental in promoting a culture of innovation and enterprise within the college.
