

### **Dr. S. & S. S. Ghandhy Government Engineering College, Surat.**

An awareness program on the Student Startup Innovation Policy (SSIP) was organized by the SSIP Cell of Dr. S. & S. S. Ghandhy Government Engineering College, Surat at Smt. L. N. B. Dalia High School, Surat with the objective of promoting innovation and entrepreneurship among school students. The program aimed to introduce young students to the concept of startups, innovation, and government support systems available under SSIP. The session was conducted by faculty members and representatives of the SSIP Cell, who interacted with students and explained the importance of creative thinking and problem-solving in today's rapidly evolving world.

During the session, students were introduced to the fundamentals of entrepreneurship, including idea generation, identifying real-life problems, and developing innovative solutions. The speakers highlighted how SSIP supports students through funding, mentorship, incubation facilities, and guidance to convert ideas into viable startups. The awareness program also emphasized the importance of developing an entrepreneurial mindset from an early stage. Real-life examples of successful startups and young innovators were shared to inspire students and encourage them to think beyond traditional career paths.

An interactive session was conducted where students actively participated by asking questions related to innovation, startup opportunities, and the role of technology in entrepreneurship. The session created enthusiasm among students and motivated them to explore their creative potential.

The program was well-received by the school authorities, faculty members, and students. It successfully created awareness about the opportunities available under SSIP and encouraged students to actively engage in innovation-driven activities in the future.

Overall, the SSIP awareness program proved to be informative and inspiring, fostering a culture of innovation and entrepreneurship among school students and strengthening the outreach efforts of the SSIP Cell..
