

A One Day Workshop on “Energy Conservation Awareness & Career Opportunities in Energy Auditing” was organized by the Electrical Engineering Department, Government Engineering College (GEC), Bhuj on 19 January 2026 at 10:30 AM in the Electrical Conference Room (221/212 F).

The workshop was conducted under the aegis of the Institution’s Innovation Council (IIC) with the support of the Gujarat Energy Development Agency (GEDA). The primary objective of the session was not only to create awareness about efficient energy utilization but also to promote innovation-driven thinking in the field of energy management and sustainability.

The expert speaker for the session was Dr. Yogesh R. Prajapati, Energy Auditor and Assistant Professor at BVM Engineering College. He shared his expertise on modern energy conservation practices, innovative approaches in energy auditing, and real-world applications in industrial and commercial sectors.

The session highlighted how innovation plays a crucial role in addressing energy challenges through smart technologies, data-driven energy audits, IoT-based monitoring systems, and optimization techniques. Students were introduced to emerging areas where innovative solutions can significantly improve energy efficiency and reduce operational costs.

Dr. Prajapati emphasized the importance of developing innovative problem-solving skills and encouraged students to explore opportunities in designing energy-efficient systems, contributing to sustainable development, and engaging in research and startup activities in the energy domain.

The workshop also provided insights into career opportunities in energy auditing, particularly in areas involving advanced tools, analytics, and green technologies. Students were motivated to participate in innovation platforms such as IIC and other initiatives to transform ideas into practical solutions.

The interactive nature of the session enabled students to actively engage, ask questions, and gain a deeper understanding of how innovation and energy conservation are interconnected.

Overall, the workshop was highly informative and impactful, inspiring students to adopt energy-efficient practices while also encouraging them to contribute innovative solutions toward a greener and more sustainable future.

## One Day Workshop on Energy Conservation awareness & Career Opportunities in Energy Auditing

**January 19, 2026 | At 10.30 AM**

📍 Electrical Conference Room – 221/212 F

**Expert:**

Dr. Yogesh R. Prajapati  
Energy Auditor  
Assistant Professor,  
BVM Eng. College

**Organized By:**

Electrical Engineering Department  
Govt. Eng. College - Bhuj

**Sponsored By:**

GUJARAT ENERGY  
DEVELOPMENT  
AGENCY

GEDA

Let's work together for a better, more sustainable future!
