“Vedic Gyan to New-Age Innovation”

The **SSIP Cell** of **SVKM's Pramukh Swami Science & H. D. Patel Arts College, Kadi** organized a **One-Day Seminar on “Vedic Gyan to New-Age Innovation”** on **22 August 2026**. The seminar was organized with the objective of connecting **India's ancient Vedic knowledge and traditional wisdom with modern innovation, entrepreneurship and startup development**.

The seminar was conducted by **Expert Shri Bhatt Harshad Kumar V.**, who provided valuable insights into the relevance of traditional Indian knowledge in the context of contemporary science, technology and innovation. The session highlighted how India's rich heritage of knowledge and practices can inspire **creative, technology-driven and sustainable solutions** to present-day challenges.

The expert encouraged students to look at traditional knowledge from an innovative perspective and explore opportunities for converting indigenous ideas into practical solutions, products and entrepreneurial ventures. The interaction also emphasized the importance of creativity, scientific thinking, sustainability and entrepreneurship in developing future-ready solutions.

A total of **97 students from B.A. and B.Sc. programmes** actively participated in the seminar. Students enthusiastically engaged with the expert and gained an understanding of how traditional wisdom can be connected with modern innovation and entrepreneurial thinking.

Key Outcomes

- Students understood the contemporary relevance of **Vedic and traditional Indian knowledge**.
- Participants were encouraged to explore traditional knowledge as a source of **innovative ideas**.

- The seminar created awareness about **entrepreneurship and startup opportunities** based on indigenous knowledge.
- Students developed an appreciation for combining **tradition, science, technology and sustainability**.
- The programme encouraged students to think creatively and identify solutions to contemporary challenges.

The seminar successfully created awareness among students about the potential of India's traditional knowledge systems to contribute to **new-age innovation and sustainable entrepreneurship**. The active participation of **97 students** made the programme meaningful and impactful.
