

A Session on Process of Innovation Development

9th February, 2023

Instrumentation & Control Department, VGEC IIC Cell and SSIP 2.0 Cell had organized a seminar on “A Session on Process of Innovation Development” for all semester students. Dr. M. K. Shah, Instrumentation & Control Department, the Head of Department, with all staff members were present at the auditorium hall. A process which incorporates the step wise methodology of innovation development was the key purpose of this event. This seminar had also helped our students to have brighter idea about the ideas and innovation. The problems are all around us but we don't identify and resolve them. This session gave ideas to cultivate the different methodology on innovation development.

Key Features:

- **Organizing Department:** VGEC ICC, IC Engineering Department and SSIP 2.0 cell
