

SSIP 2.0 Sensitization Sessions

1. Event Name:	Algorithms Behind the Digital World — From Ideas to Innovative Solutions
2. Date:	19/08/2026
3. Venue/ Mode:	CE4, Offline
4. No of Participants:	30
5. Speakers/Coordinator Name	Mr. Veer Shah, Director of Prelitix Pvt. Ltd., Anand, Gujarat
6. About Event:	The session was organized for students of 3rd Year B.Tech. Computer Engineering and Computer Science and Design programs. The expert talk aimed to provide students with practical insights into the importance and applications of algorithms in today's digital world. It focused on helping students understand how algorithmic thinking plays a crucial role in solving real-world problems and how innovative ideas can be transformed into practical technological solutions. The session provided an opportunity for students to connect their academic understanding of algorithms with real-world applications, explore emerging technological trends, and gain valuable insights from industry perspectives. The interaction with the expert encouraged students to think creatively, strengthen problem-solving skills, and understand the role of algorithms in developing innovative digital solutions.
7. Outcome of Event:	The Expert Talk "Algorithms Behind the Digital World – From Ideas to Innovative Solutions" provided students with valuable exposure to the practical applications of algorithms in the digital and technology-driven world. The key outcomes of the session were: • Students gained a better understanding of how algorithms are used to solve real-world problems and support modern digital technologies. • Students developed insights into the process of transforming ideas into innovative and practical solutions through algorithmic thinking. • The session helped students connect their academic knowledge of algorithms with industry-oriented applications. • Students were introduced to the importance of problem-solving, logical thinking, and efficient algorithm design in technology development. • The interaction with the expert provided students with industry perspectives and practical insights into emerging technologies and their applications. • Students were encouraged to explore innovative ideas and technological solutions for real-world challenges. • The session motivated students to enhance their technical skills, create projects, and develop a strong interest in algorithm-driven technologies.
