

## **1) A SESSION ON IMPORTANCE OF PREDICTIVE ANALYSIS IN NEW PRODUCT DEVELOPMENT**

**Event Date:** 23.07.2022

### **About the event:**

Mr. Gaurav Harane, Application engineer at Engineering Technique, presented a session titled "Importance of predictive analysis in new product development" on the 23rd of July, 2022, at ASHINE. During the seminar, he discussed simulation and the significance of anticipating product performance when developing a prototype. During the presentation, he also showcased the 3DEXPERIENCE® WORKS Simulation portfolio from Dassault Systèmes' SIMULIA brand, which enables Designers and Design Engineers to execute efficient product performance assessment for different domains during the design phase. The straightforward and robust solution enables them to evaluate and compare design alternatives for superior performance, dependability, and safety. Total 56 students, start-up founders & Start-up enthusiast registered for the session.
